

Economic Systems and Quality of Life

Scarcity

Want vs. need

Why might something be scarce?

Land – *ALL* materials

Labour – physical and mental effort

Capital – money (and anything worth money)

What is Scarce?

And does it have to be?

Public Ownership

If the government owns something, what are they trying to do with it?

Private Ownership

If a business owns something, what are they trying to do with it?

- For each of the following, answer whether you think it should be publicly or privately owned.

- Gold
- Oil & Gas
- Agriculture
- Water
- Forest Parks
- Schools
- Health Care

Economic Systems – How do you solve scarcity?

Planned

- Government makes all of the decisions
- Gov't owns and manages resources
- Publicly owned
- Individual consumers have little economic freedom

Market

- Private business makes decisions
- Individuals make decisions on how to use resources
- Privately owned
- Individual consumers drive economic decisions by making choices about what to buy

What about Canada?

- A “mixed” economy
- Some resources are publicly owned and some are private
- Individuals and government both make decisions about what to produce
- Individual consumers and government influence economic decision making
- This “mix” can change depending on the party in pc

To prepare you for Grade 12 and LIFE

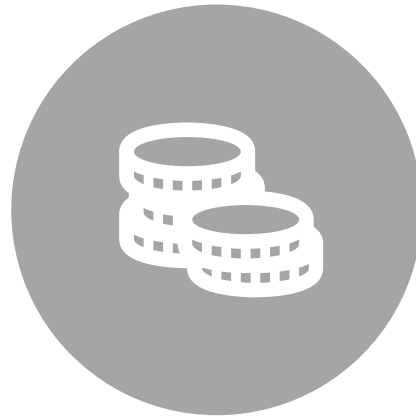

Is it better for the public good to work together or
for each person to work as individuals?

Public Good: **the benefit or well-being of the public.**

ASSIGNMENT

Wagers on Polymarket, a crypto-powered platform, that Nicolás Maduro would be out of power by the end of January rose in the hours before President Donald Trump announced on Saturday the Venezuelan leader had been seized.

One account, which joined the platform last month and took four positions, all on Venezuela, made more than \$436,000 (£322,000) from a \$32,537 bet.

It remains unclear who placed the bet. The anonymous account had a blockchain identifier of letters and numbers.

Polymarket data shows traders put the odds of Maduro's exit at just 6.5% in the afternoon of Friday 2 January.

Market Economy vs. Planned

SELF DRIVING CARS

c

This time ask yourself:

Is it better for the public good to work together or for each person to work as individuals?

- What would it look like to “work together”? Who pays? Who is rewarded?
- What would it look like to have individuals working alone? Who pays? Who is rewarded?
- What’s best for the public?

• So.... Solve:

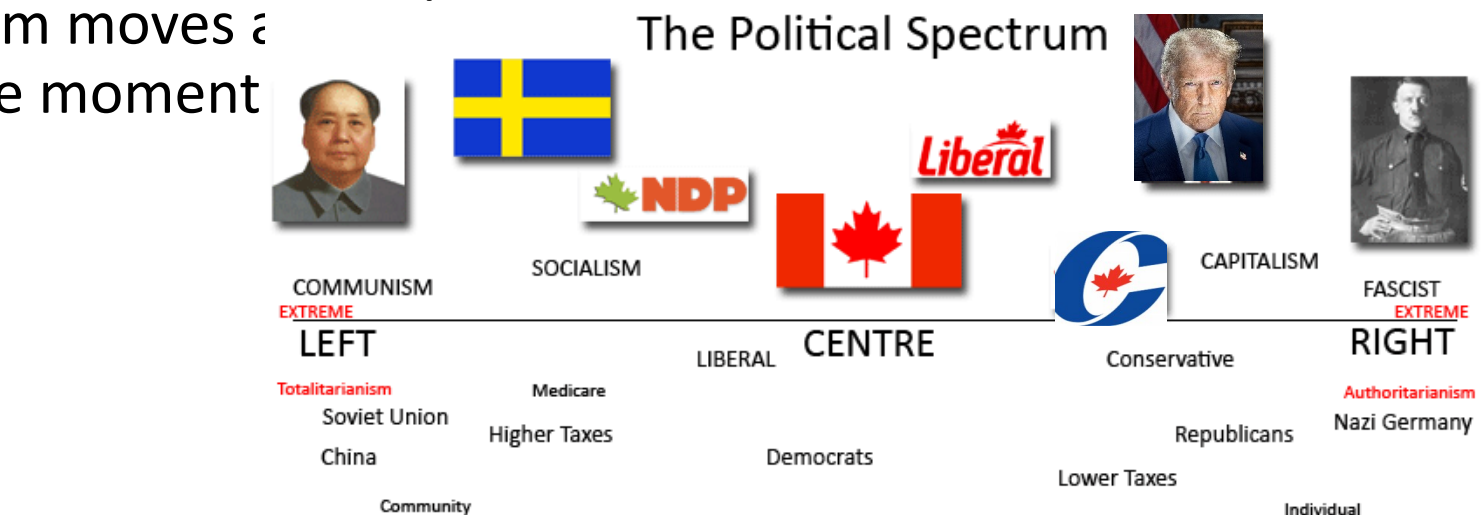

- Better smartphones
- Better education
- Cancer
- Climate Change

Canada's Economy – Peace, Order & Good Government

Founding principle of Canada reflects the idea of cooperation, connected to Francophone/Anglophone beginnings

Cooperation is important for the Canadian economy but competition plays a role as well. This is why we have a mixed economy.

However, our place on the continuum moves a depending on who is in power at the moment

Draw a continuum in your own notes!

Canada's Economy – Peace, Order & Good Government

1963 – 1968 Liberal Party

Shift **Left**

Lester B. Pearson formed a minority government and cooperated with the NDP

Larger role in the economy, including:

- Publicly funded health care
- Pensions for senior citizens

1984 – 1993 Progressive Conservative Party

Shift **Right**

Brian Mulroney forms a majority government. Reduces involvement in the economy, including:

- Cuts to government spending
- Privatizing government-owned corps (more on that later).
- Signed NAFTA (North American Free Trade Agreement)

The U.S. Economy – Life, Liberty and the Pursuit of Happiness

Founding principle reflects the idea individualism.

Influences the economic system of the U.S. where individuals have more power and the government has little involvement (Market economy)

The position on the economic continuum shifts right and left depending on who is in power.

United States' Economy – Life, Liberty and the Pursuit of Happiness

1933 – 1944 Democratic Party

Shift **Left**

Franklin Roosevelt had to respond to the Great Depression, did so with the “New Deal”

Larger role in the economy, including:

- Funds to support farmers
- Pensions for senior citizens
- Corporations run by gov't, public works projects (roads, dams)

1980 – 1988 Republican Party

Shift **Right**

Ronald Reagan wanted less involvement in the economy:

- Reduced government spending
- Reduced government regulations on corporations (for example, environmental standards).

Supply and Demand

- Time to explain how the world works.

☐ Travelling shot with normal traffic flow on *...		☐ Camera in car ☐ Involving tow rig	
☐ Intermittent traffic stoppages under PDO supervision on (max. 3 minutes)(Please specify location)...			
☐ Bus Stops or Shelters to be relocated *			
☐ Full road closure under PDO supervision on *.... (\$560.39 admin fee - fee does not include other costs associated with the production such as sign/meter removal, bus stop relocation etc.)			
☐ Lane closure on.... (\$210.81 admin fee - fee does not include other costs associated with the production such as sign/meter removal, bus stop relocation etc.)			
☐ under PDO supervision - TBD			
SPFX gunfire (blanks / squibs /) under ETFIEDU supervision			

Consumerism

IS IT GOOD TO BUY? HOW MUCH IS TOO MUCH?

Steve Cutts

ADVERTISING TECHNIQUES

Bandwagon Effect

- Encourages you to buy a product or service because everyone else is.

Emotional Appeal

- Uses strong emotional language that connects with your fears and desires.

Glittering Generalities

- Relates the product or service to words or images that promise everything, but deliver little or nothing.

Plain Folks Appeal

- Relates a product or service to the experience of ordinary folks.

Testimonials

- Uses celebrities or experts to speak for a product.

Scientific Appeal

- Uses statistics or scientific data to persuade consumers to buy a product or service.
