

What is Economics?

- Economics is: concerned with the production, consumption, and transfer and distribution of wealth.
- In plain terms: how to best make stuff, use stuff and get paid.

Mercantilism

- a country should export more goods than it imports, accumulate wealth in gold and silver, and protect its economy by taxing and setting quotas on imports
- **THE MONARCH CONTROLS THE ECONOMY**
- After watching the video, how do you think the colonies would feel about this arrangement?
